### Penerangan

There are many Malaysian cook books in the market but there is none for professional who have just been introduced to this industry for the chefs and F&B personnel who are new to Malaysia, its people, weather and most of all its cuisine.

With this in mind, I started to collect recipes from places that I have studied, trained and worked.

The recipes are mainly basic, but with enough flair and creativity, they can be extended and explored to be prepared and displayed in a contemporary way, which may not become exclusively Malaysian. The recipes are tasted and tested but it is still up to the individual to find the right combination through trial and error.

Basic food cost is elaborated with formulas and samples to assist students and professional to have a better understanding how to apply and familiarise themselves with food cost.

Thus, in this book, pork and non-*halal* foods are not featured.

I hope this book will serve as guideline on Malaysian cuisine so many will have a better understanding of this beautiful country, especially students who are embarking on a new journey to becoming a chef.
